Figure 1

(a) % colonization by Microrhopala vittata

- Durland
- LabO
- Liddell
- Whipple

(b) Frequency

- Number of M. vittata / gall

- Observed
- Expected
Figure 2

Time since release (hours)

Number of *M. vittata* remaining

- Ungalled / undamaged
- Ungalled / damaged
- Galled / undamaged
- Galled / damaged
Figure 3

(a) Number of feeding holes

(b) Leaf area eaten (cm²)

- **P = 0.057**

- ***P = 0.057***
Figure 4

Panel a: SPI activity (µg / mg protein)

Panel b: Total diterpene acids (absorbance x 10^3)

Panel c: Total VOCs (ng/h)

Legend:
- Ungalled
- Galled

Control vs. damaged: a) significantly different, b) not significantly different, ab) similar but different from control
