## Provenance report regarding Kastane met schede [*Silver sabre*]

*Alicia Schrikker and Doreen van den Boogaart*

*In collaboration with Senarath Wickramasinghe (National Museum, Colombo)*

*Rijksmuseum, Amsterdam, inv.no. NG-NM-7112*

Custodian	Rijksmuseum Amsterdam
Current possessor	The Dutch State
Current location	Rijksmuseum Amsterdam
Inventory number	NG-NM-7112
Material/technique	silver (metal) wood (plant material) iron (metal) gold (metal) diamond (mineral) ruby (mineral) crystal (lead glass) forging / casting
Measurements	length 61.5 cm length 49 cm × width 5.5 cm width 9.3 cm width 3 cm

## Summary of findings

NG-NM-7112 is a highly ornamented Sri Lankan kashhāné, or sabre, with a silver hilt shaped with four lion heads (simhas). Its shape and ornaments are typical for kashhāné from the Kandyan Kingdom in the eighteenth century. This kashhāné is made in the Royal workshop of the Kingdom of Kandy and was probably meant for a member of the Kandyan aristocracy. At present, the silver kashhāné is on display in the Rijksmuseum and presented as a spoil of war, obtained by the VOC during the war with Kandy in 1765.

The object most likely arrived in the collection of the Dutch stadtholders (Willem IV and Willem V) prior to 1795 and was first recorded in 1816. It is not exactly clear, however, what route the silver mounted kashhāné took from Kandy into the collection of the Dutch stadtholders, which eventually became part of the Rijksmuseum Amsterdam collection. The eighteenth-century archival trails of this object are less certain. Various scholars have suggested that this object was among the spoils of war that Dutch East India Company Governor of Ceylon, Lubbert Jan van Eck (in office 1762 – 1765), collected after the siege of the palace in 1765 and that were sent to his heirs in the Dutch Republic in 1768. This report shows that it is not possible to identify the silver mounted kashhāné with any certainty among objects described in the estate of Governor Lubbert Jan van Eck at the time. We have also found no documentation of the transfer of this object by any of the heirs of Van Eck to the collection of the stadtholder Willem V. At the same time, we have also not come across evidence that would suggest another provenance. The exact moment of arrival of the silver mounted kashhāné into the collection simply remained unrecorded.

In the nineteenth and early twentieth centuries the Kandyan provenance was forgotten, and at least until 1937 the kashhāné was described as originating from mainland Southeast Asia. Since 1965 the silver kashhāné has been catalogued once more as a spoil of the Kandyan-Dutch war by the Rijksmuseum together with the gold mounted kashhāné and knife and Lewke's cannon.

## Reconstruction provenance

### Seventeenth/ Eighteenth century

Made in the Paṭṭal Hatara. The Four Workshops of the King of Kandy.

*Object analysis, this report.*

### [date unknown] – 1795/1816

presumably Stadholders' collection, Dutch Republic

### 1795?-1816?

Presumably brought along in exile with Willem V to England and later (maybe) taken to Brunswick, Germany; Slot Oranienstein, Germany

*Jan van Campen, De Haagse jurist Jean Theodore Royer (1737-1807) en zijn verzameling Chinese voorwerpen (Uitgeverij Verloren, 2000), 215; PPROCE Report RV-360-6021.*

## 1816 – 1885

Koninklijk Kabinet van Zeldzaamheden, The Hague

## 1927 – present

Rijksmuseum Amsterdam

## Introduction and context

This provenance report focuses on NG-NM-7112, a silver mounted kashāné currently displayed in the Rijksmuseum, Amsterdam in room 1.5: *The Netherlands overseas*. The current narrative adopted by institutions and researchers is that this kashāné, together with a gold mounted sabre (NG-NM-560), a golden knife with crystal hilt (NG-NM-7114), a cannon (NG-NM-1015) and two wall-guns (NG-NM-519 and 520) were spoils of the Kandyan-Dutch war (1762-1766) and obtained during the violent, ruthless plundering of the Kandyan Palace in 1765.

In this provenance report we assess the material and archival evidence that has been used to support the presentation of the silver mounted sabre as part of the spoils of war and discusses the current gaps in our knowledge regarding this object. In the report we will therefore answer the following questions:

- 1) Which material elements support the thesis that the silver mounted sabre was of royal origin?
- 2) What knowledge is available in the museum and the literature regarding the provenance of the object?
- 3) What is known about the objects that were looted during the siege of the palace and town of Kandy in 1765 by the VOC?
- 4) To what extent do the eighteenth-century archival records from the VOC, the family archive of Van Eck, and the Royal Archives (KHA) provide us with concrete evidence that connects the kashāné to the Kandyan-Dutch war of 1762-1766?
- 5) What route did the kashāné take through the Dutch collections?

The research was conducted in collaboration with experts from the Sri Lankan National Museum in Colombo and the Rijksmuseum in Amsterdam.

## Object analysis

The silver mounted kashāné has been analysed in the Atelier of the Rijksmuseum Amsterdam on 18 May and 25 November 2021 together with specialists from the museum's Conservation & Science department. The metal measurements and analysis of the stones were shared with Senarath Wickramasinghe from the Sri Lankan National Museums. He further analysed the design and decoration on the silver mounted kashāné with the help of a series of detailed photos that were made on 18 May 2021 and 25 November 2021. Based on these data and earlier publications on Kandyan arms, Senarath Wickramasinghe provided us with his analysis of the object, which we have integrated in this overall object analysis.

There is no doubt about the Kandyan origin of the kashāné, as it is a very typical Kandyan, and therefore Sri Lankan object.<sup>1</sup> Kashāné were ceremonial swords or sabres and not used as fighting swords. The kashāné came in different qualities, and can in general be divided into two categories: 'up-country' kashāné (referring to the mountainous area of the Kandyan kingdom) and 'low-country' (referring to the island's maritime regions that were partially occupied by the Dutch) kashāné. Kashāné from the low country (i.e. the area under Dutch rule) were coarser, both in design and in material used.<sup>2</sup> The Rijksmuseum holds an example of such a low country kashāné: NG-1982-18, in this case the hilt is made of carved wood.<sup>3</sup> For the Kandyan nobility, kashāné were part of their formal custom when in function. Kashāné were typical gifts from the Kandyan king to his highest nobles in reward for their service and on occasion were used as diplomatic gifts.<sup>4</sup> The king had decorative objects such as jewellery, swords, and chains made in the Four royal workshops (pattal hatara) for this purpose.<sup>5</sup>

The craftsmen from the pattal hatara worked almost exclusively for the court and their positions were hereditary. The Four Workshops were divided, respectively, into the "jewel," "crown," "golden sword," and "throne" workshops. Kashāné produced in the royal workshops were all high quality, yet the exact quality in terms of design, decoration, and material of the kashāné signified the rank to whom the object was gifted: the more decorated (i.e. use of figures, gems, silver, gold), the higher the rank of the receiver.<sup>6</sup>

The ceremonial function of Kashāné at the Kandyan court are described in travel reports and in drawings and paintings of Kandyan chiefs and noblemen by Dutch artists in the eighteenth century.<sup>7</sup> For example, in 1681 Robert Knox observed:

<sup>7</sup> Cf. Collection Rijksmuseum Amsterdam, RP-T-1904-18,2, <https://www.rijksmuseum.nl/en/my/collections/28203--roel-kramer/eye-kandy/objecten#/RP-T-1904-18,2>; NG-1985-7-1-8, <https://www.rijksmuseum.nl/en/collection/NG-1985-7-1-8>; NG-1985-7-3-127 <https://www.rijksmuseum.nl/en/collection/NG-1985-7-3-127>

When he [the Kandyan King] first promotes them [the Adigar] (...) he (...) gives them a sword, the hilt all carved and inlaid with silver and brass very handsomely, the scabbard also covered with silver — a knife, and halberd; and lastly, a town or towns for their maintenance.<sup>8</sup>

And in 1803 James Cordiner similarly explains that fine silver *kasthāné* were produced for the Kandyan nobility:

All the men in office wear swords of a moderate size, antiquated and not formidable in appearance. The hilt and scabbard are made of silver. The former imitates the head of a tiger, the latter is embossed and turned round at the point.<sup>9</sup>

Dutchmen were also gifted with sabres or swords described as “silver-hilted” occasionally during their diplomatic embassies to the Kandyan king.<sup>10</sup> We do not know what these swords looked like, but we know that the king perceived the Dutch as vassals, and therefore may have treated the ambassadors the same as his chiefs and gifted them with the same kind of gifts, including *kasthāné*.<sup>11</sup>

Senarath Wickramasinghe emphasizes that silver *kasthāné* like NG-NM-7112 could have been made for members of the highest aristocracy only. What makes this silver *kasthāné* so special? Material analysis done by the Rijksmuseum conservation department reveals the following: the *kasthāné*'s hilt is of near solid silver. Its curved blade is made of steel, while the blood trench is covered with silver tendrils.<sup>12</sup> The wooden sheath is completely silver-plated and decorated tendrils ending in a curl.<sup>13</sup> The silver *kasthāné* is set with several pale coloured gemstones. One of those has been examined more closely by Dr Hanco Zwaan of the Netherlands Gem Laboratory, Leiden and the Conservation & Science staff of the Rijksmuseum and might be a chrysoberyl cat's eye, with presumably a provenance in Sri Lanka. It is a very transparent stone and needs more research.<sup>14</sup>

<sup>11</sup> At the last audience during the yearly embassies by the VOC to the Kandyan Court, it was customary that gifts were also given back to the ambassador, his secretary, and the interpreter. The gifts depended on the rank of the VOC official. Ambassadors usually received silver swords [*kasthāné*?], golden chains, and golden rings set with stones. The secretary got a golden chain and rings and the interpreter only a chain. Sometimes, when the ambassadors pleased the king, they would also receive an elephant. T. B. H. Abeysinghe, “Embassies as Instruments of Diplomacy: A Case Study of Sri Lanka in the First Half of the Eighteenth Century” *Journal of the Royal Asiatic Society Sri Lanka Branch*, 1985/86, New Series, Vol. 30 (1985/86), p. 17-18; In this Sinhalese account of a Dutch embassy to the court of Kandy in 1731-32 the word *kasthāné* is literally used for the sabre gifted to the Dutch ambassador: Paul E. Pieris, “The Dutch embassy to kandy in 1731-32.” *The Journal of the Ceylon Branch of the Royal Asiatic Society of Great Britain & Ireland*, vol. 21, no. 62, Royal Asiatic Society of Sri Lanka (RASSL), 1909, pp. 187–220: 213.

Senerath Wickramasinghe concludes on the basis of the technology, workmanship and decorative motif that this is a typical Kandyan up-country *kasthāné*, possibly produced in the Kandyan royal workshops. He describes the Kandyan elements as follows: <sup>15</sup>

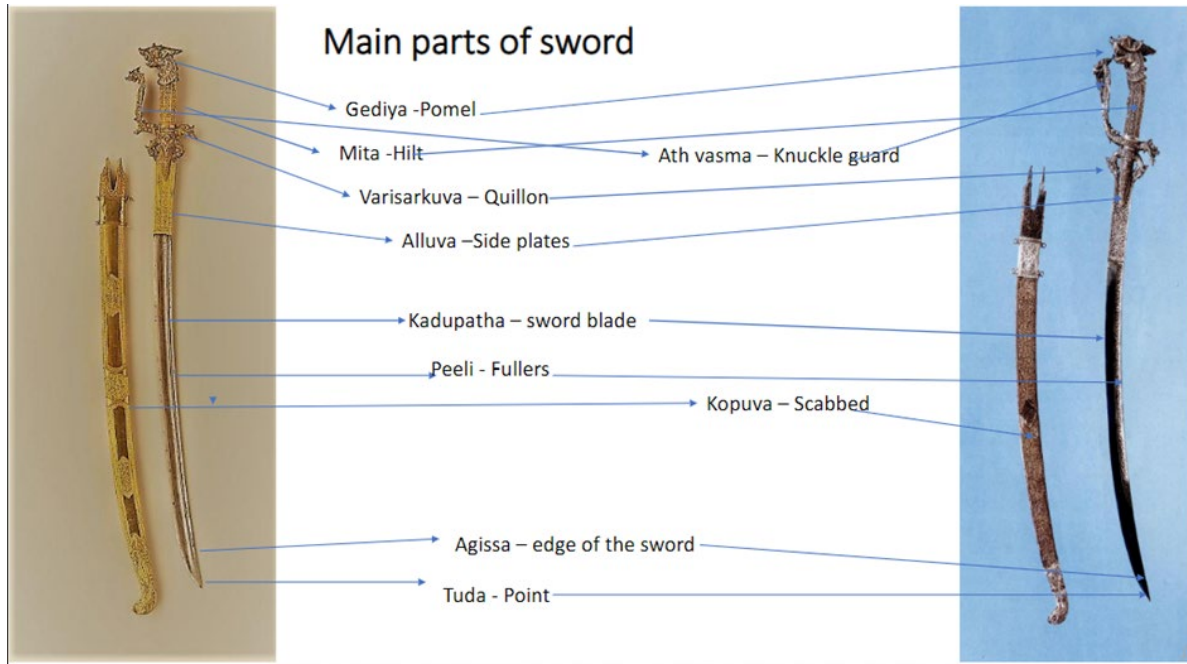

Photo 2: : Explanation of the different parts of a *kasthāné*, by Infographic (Photo by Senarath Wickramasinghe)

“The pommel (*gediya*) has a *simha* head with conical crest. The lips and eye lids are decorated with *arimbuva* ornaments, the ears are leaf shaped with carved tip and the main is shown as three whorls *liyapata* (*palapeti*). The silver hilt (*mita*) has octangular and decorative panels that are separated by plain longitudinal ridges. The knuckle guard (*Ath Vasma*) has a *Sarapenda* (lion-head and bird’s body) motif which arises from one quilian and runs forward towards the pommel. The lower part has *arimbuva* decoration. The front surface shows a standing female figure — known as *nari lata*.”

<sup>15</sup> Presentation Senerath Wickramasinghe, Director (Cultural) Department of National Museums, Sri Lanka, “Ancient swords, daggers, and knives in Sri Lankan museums,” *Expert meeting Sri Lankan objects Rijksmuseum*, 27 August 2021. Please note that documentation on this will be available via the Documentation folder of the Rijksmuseum Amsterdam from April 2022.

Photos 3 and 4: Nari Lata on silver mounted *kashhane* (Rijksmuseum, Amsterdam, inv.no. NG-NM-7112).

Furthermore, Wickramasinghe tells us: “The quilion (Varisarkuva) is shaped in the form of a makara (dragon) head. The Ricasso has a long rectangular silver overlay and liyapata decoration. The blade (Kadupatha) is more curved and decorated than the golden sword (NG-NM-560) and single fuller and it extends to near top of blade. The blade is decorated with a liyavela design.”<sup>16</sup>

The steel blade of the silver *kashhane* is made in Kandy, as is evidenced from the decoration on the blade and the way in which the iron is polished.<sup>17</sup> In that regard, this silver mounted *kashhane* stands out, as the blades of other Kandyan *kashhane* from the same period, including NG-NM-560, were often of European origin.<sup>18</sup> The scabbard (Kopuva) is made of wood, entirely covered by wooden foil with embossed traditional motif. The upper end is “V” shaped. The designs are similar to other *kashhane* of the Kandyan period, placing its creation in Kandy in between 1597–1815.<sup>19</sup>

<sup>16</sup> Presentation Senerath Wickramasinghe, 27 August 2021..

<sup>17</sup> XFR report, Rijksmuseum Amsterdam dated 30 November 2021. Please note that these reports will be available via the Documentation folder of the Rijksmuseum Amsterdam from April 2022.

<sup>18</sup> P.H. D. H De Silva and Senerath Wickramasinghe, *Ancient Swords, Daggers, and Knives in Sri Lankan Museums* (Colombo: Dept. of National Museums, 2007): 147.

<sup>19</sup> Presentation Senerath Wickramasinghe, 27 August 2021. For the typical Kandyan decorative elements such as the Nari Lata, the liyapata the sarapenda and the simha see: Coomaraswamy, *Mediaeval Sinhalese Art*, chapter IV: “Elements of Sinhalese design and ornament.”

*Photos 5 and 6: Details of the scabbard. Notice how the kibihi-muna (lion face) is used as starting point of the flower pattern. (Rijksmuseum, Amsterdam, inv.no. NG-NM-7112).*

Based on the exceptionally fine silverwork, it is concluded that the silver *kasthāné* was made in the Four Workshops of the Kandyan King. *Kasthāné* produced in the royal workshop were all of high quality, yet the exact quality in terms of design, decoration, and material of the *kasthāné* signified the rank to whom the object was gifted: the more decorated (i.e. use of figures, gems, silver, gold), the higher the rank of the receiver.<sup>20</sup> The object analysis does not provide us with further evidence about the intended owner of the *kasthāné*, except that the exquisite use of silver and gems suggests it was exclusively made for one of the *adigars*, or other members of the highest aristocracy at the court.<sup>21</sup>

## Present knowledge regarding provenance available in the Rijksmuseum and literature

The silver *kasthāné* is a well-known object and is described in various Rijksmuseum catalogues and specialist publications on Sri Lankan and south Asian arms and armour.<sup>22</sup> The various authors consistently suggest that the *kasthāné* was part of the spoils of the Kandyan-Dutch war and that it was presented as a gift to the Dutch stadtholder Willem V by the executors Governor van Eck's estate. Where does this information come from?

This *kasthāné*, together with the golden *pihiya* and the gold mounted *kasthāné* (NG-NM-7114 and NG-NM-560) became objects of historical research for the first time in the 1960s, when two near-simultaneous exhibitions were being prepared: one in the Dutch National Archives (then called Algemeen Rijksarchief) on the history of the VOC in Sri Lanka (then called Ceylon) (*Ceylon-Nederland in het verleden 1602-1797*), and one memorial exhibition on the Dutch royal collections: *Koninklijk Kabinet van Schilderijen, Koninklijke Bibliotheek en Koninklijk Penningkabinet*.<sup>23</sup> Professor Th. H. Lunsingh Scheurleer, who was affiliated with the Rijksmuseum until 1963, worked on the latter.<sup>24</sup> Correspondence between the Rijksmuseum and the Dutch National archives in 1965 show how both parties were looking for archival evidence on the provenance of these three objects, in addition to their search for extra information on Lewke's cannon, which already had been object of research.<sup>25</sup> The National Archives provided the museum with copies from the VOC archives regarding the spoils of the Kandyan-Dutch war of 1765, dated at 22 October 1765 (though misread at the time as 22 December 1765).<sup>26</sup>

Copies from the estate of Governor van Eck from his family archives were also added as evidence of the objects' provenance. It was on the basis of this documentation that the curators concluded that together with the cannon, the silver *kasthāné*, and the two other objects, the golden *kasthāné* (NG-NM-560) and the golden *pihiya* (NG-NM-7114) were spoils of the Kandyan-Dutch war. It was subsequently described as such in both exhibition catalogues.<sup>27</sup> Curiously though, Lunsingh Scheurleer connected the silver *kasthāné* to a silver 'belly-dagger' (*buiksteker*) from the list.<sup>28</sup> Here

<sup>26</sup> Ibid.

<sup>27</sup> Lunsingh Scheurleer, *150 Jaar: Herdenkingstentoonstelling*, 74.; Meilink Roelofs, *Ceylon-Nederland in het verleden, 1602-1796* (Den Haag 1965), 23: "Zilveren sabel van Singalees maaksel, afkomstig uit boedel L.J. baron van Eck."

<sup>28</sup> Lunsingh Scheurleer, *150 Jaar: Herdenkingstentoonstelling*, 74. He cites from the source as follows: 'Een-Buijk-Steeker met silver beslag zijnde een instrument waarmede seeker Moor van de vijanden omgecogt in Candia het op het Leeven van den overleedene had toegeleght'. See below for a more extensive discussion of this reference.

Lunsingh Scheurleer was clearly mistaken. The word buiksteker (lit. ‘belly-dagger’) refers to a waist-knife, rather than a sabre or sword. The word buiksteker was not commonly used at the time in the Dutch Republic, but we found a reference from Bengal in the same period, explaining that a buiksteker was a dagger carried around the waist. Historically, the word houwer (sabre or sword) would have been used to describe a kashhāné.<sup>29</sup>

In 1975 the director of the National Museum in Colombo, P. H. D. H. de Silva, undertook the laborious task of identifying all Sri Lankan objects and manuscripts that were kept in collections outside Sri Lanka. His overview was published under the title *Antiquities and Other Cultural Objects from Sri Lanka (Ceylon) Abroad*.<sup>30</sup> This has become a classic reference work and in 1980 De Silva’s catalogue formed the basis of a large restitution request of the Sri Lankan government, which was unsuccessful.<sup>31</sup> Among the described Sri Lankan objects in the Rijksmuseum we also find the silver mounted kashhāné. De Silva stresses the elegance and uniqueness of the object:

N.M. 7112 – A Kastané sword as elegant and dignified as N.M. 560, but hilt and scabbard are of silver. Pommel of hilt with *simha* head. Counter guard terminating in a *serapendiya* head at its upper end and with *simhah* end at lower extremity. *Pas d’ane* terminating in *simha* heads. Ricasso and portion of blade with silver overlay work. Length 60-5 cm.<sup>32</sup>

Researchers who published on this group of objects more recently, such as Lodewijk Wagenaar, Pauline Lunsingh Scheurleer, and Ebeltje Hartkamp-Jonxis, did not question the assigned provenance of the silver kashhāné and the two other objects.<sup>33</sup> In the most recent publication, *Cinnamon and Elephants*, Lodewijk Wagenaar writes that the two kashhāné and the dagger were gifted together with the cannon (NG-NM-10150) to Duke Louis Ernest of Brunswick-Wolfenbüttel, who transferred them to Stadtholder Willem V. The silver kashhāné, as well as the golden pihya and the golden kashhāné, would have been taken by the Dutch army in Kandy.<sup>34</sup>

Since 2015, the Rijksmuseum label has described this group of objects as follows:

Following an unsuccessful invasion of Kandy in 1764, the VOC troops nevertheless succeeded one year later in penetrating the king’s centre of power. Peace negotiations failed and the troops plundered the palace and the city. The booty included many costly jewels and arms, including these three ornate weapons that were probably the king’s personal property.<sup>35</sup>

What we want to highlight here is that the information gathered in 1965 has circulated ever since as unquestioned fact. It appears that subsequent researchers have not looked up the original documentation in the Van Eck estate, nor in the VOC archives. This is evidenced by recurring references in the literature of 22 December rather than 22 October 1765 as the first date when the looted objects collected by Van Eck were first listed.<sup>36</sup> The documentation gathered in 1965 requires further scrutiny. How were the objects from the lists in the VOC archives and the Van Eck family archives identified? Were the objects indeed gifted to Stadtholder Willem V (via the Duke of Brunswick) in conjunction with the cannon? How and when did these objects, including the silver *kasthāné*, arrive in the collection of the Rijksmuseum in the first place? And what was known about them at the time?

### **The Kandyan-Dutch war 1762-66 and the spoils of war**

The association between Lewke's cannon and the silver *kasthāné*, the golden *pihiya*, and the golden *kasthāné* is very strong. This was also the ground on which they were connected with the Kandyan-Dutch war in 1765 and to the estate of Governor van Eck. What exactly is known about the objects that were obtained in the war? What information is provided in the VOC archives and the family archives of Van Eck? And can we indeed identify the golden *kasthāné* in Van Eck's estate?

The Kandyan-Dutch war of 1762-1766 is commemorated in both Sinhala and Dutch primary sources, and in both cases the looting of objects plays a prominent role. A royal historical chronicle from Sri Lanka, the *Cūlavamsa*, describes how the king of Kandy decided to support popular resistance against the VOC. "[His] dignitaries set forth with the people living in Lanka, fought the fearful battle with the Olanda people, destroyed the foe, burned down the strongholds and terrified him in every possible way."<sup>37</sup> Conflicts between the Dutch and the local inhabitants of the Dutch occupied areas had started in 1759/60 but in 1761 the restrained relations between the Dutch in Colombo and the king of Kandy led to open warfare.<sup>38</sup> VOC Governor Lubbert Jan van Eck got hold of the Kandyan lowlands in 1762 and 1763, whereupon he decided to invade the town and palace of Kandy up in the mountains. The first campaign of early 1764 failed completely.<sup>39</sup> Even after the Dutch VOC troops invaded the city of Kandy on 19 February 1765, the Kandyan defence used guerrilla tactics, by retreating fast after an attack and using the rainy season to their advantage.<sup>40</sup>

During the days before the invading of Kandy, the king brought to safety his family and the treasures of the Kandy Palace and Temple of the Tooth.<sup>41</sup> An eyewitness, a Dutch soldier who worked as

<sup>41</sup> *Culavamsa*, p. 267, line 122-126. The King had sent two Uparajas with his treasures and the sacred Tooth Relic to "a province which was scarcely passable owing to mountains, forest and difficult roads."

surgeon in Kandy, described the situation as follows: “The King, with tears in his eyes, had caused the most precious objects to be removed from the Palace, and had then given leave to his troops to take what they wished of the remainder [treasures].”<sup>42</sup> This was not in vain as the Temple of the Tooth, the most important Buddhist shrine on the island, was targeted by the Dutch army and when they forced their way into the town, the palace and temple were razed by the troops and they “destroyed the sacred books and everything else.”<sup>43</sup> The court was desecrated due to the slaughtering of the holy cows and the destruction of the Buddha statues and the palace was set on fire when the Dutch troops eventually retreated from the city due to strong resistance and a lack of food on 31 August 1765.<sup>44</sup>

The troops invading the city on 19 February 1765 were explicitly instructed not to plunder, but upon arrival in Kandy, the Dutch troops had found the warehouses partly emptied by the retreated Kandyan troops, who were allowed to do so by the king.<sup>45</sup> The looting that followed spread from the warehouses to even the apartments of the king himself.<sup>46</sup> Among the objects taken were linen, fabrics, furniture, some silverwork objects, curiosities, and copper coins.<sup>47</sup> Officers, soldiers, and slaves alike went looting. For instance, it is recorded that back in Kandy one officer had taken “silverworks, diamonds, and rings with and without stones”.<sup>48</sup> This officer had defended himself later in Colombo by saying that he had bought the objects from two soldiers, just as Governor Van Eck himself had done. In fact, Van Eck had also bought several valuable and rare objects from the spoils. “Those objects might have been sold for give-away prices to Moors who were waiting to buy it,”<sup>49</sup> he wrote. Indeed, a great deal of the booty was sold or left behind by the soldiers in Kandy or during their trip back to Colombo after the retreat of the troops from Kandy at the end of August 1765.<sup>50</sup>

<sup>50</sup> Ibid, f. 369.

Governor van Eck died some weeks after the conquest of Kandy and in his estate ten Kandyan objects were identified as spoils of war. These ten objects were described as follows:

- A golden container with a golden ola as well as a small bag with small golden balls attached
- A Buddha statue made of tombac
- An ivory machine with underneath a metal disk, that has an engraving in it
- A small canon piece inlaid with silver
- A fine decorated bow with golden mounting, together with an equally decorated quiver and arrows.
- A sword with golden grip and its sheath with golden mounting together with a part epee [sword knot] with silver mounting
- A red-lacquered baton of command with on both ends golden studs
- A fine decorated belly-knife with golden mounting
- A silver gold plated machine as a clock with underneath a fitting bottom piece
- A kind of palate/canopy with pillars of gold but overlaid with gold and silver.<sup>51</sup>

The ten objects were delivered to the big cash register [grote geldkas], which was commissioned by Hoofdadmirateur Daniel Burnat. By then, the decorated cannon had already been shipped to the Netherlands (on 15 November 1765), as the late Governor Van Eck had wished. It was sent as a gift to Duke Louis Ernest of Brunswick-Wolfenbüttel, the guardian of Willem V. On 13 May 1766 the headquarters of the VOC in Batavia gave permission to send the Kandyan objects that were left of Van Eck's estate to his heirs, provided that court in Kandy would not demand restitution.<sup>52</sup> Two objects from this list, namely, the Cover of the Tooth of Buddha (the silver-gilded machine) and the accompanying howdah (the canopy) were indeed returned in 1767 to the king of Kandy as a result the peace negotiations.<sup>53</sup> The golden container with golden ola was returned to the 'owner' from whom Van Eck had taken it, because e had never paid for it as he had promised.<sup>54</sup> In 1768 there were

<sup>54</sup> NL-HaNA, 1.10.65.01, inv.no. 66, "Inventarissen van de nagelaten goederen van Lubbert Jan van Eck etc." [Inventories of the state of Lubbert Jan van Eck etc.], dated 20 March 1769.

six objects left described as “curiosities that were found [gevonden] during the conquest of the Palace of the King of Kandy and looted [buitgemaakt].” These were sent to the heirs of Van Eck on the ship *Vrouwe Petronella Maria* in a box with the initials VE.<sup>55</sup>

It is important to underline here that there is no mention at all of a silver sword or *kasthāné* in the listed spoils of war in the estate of Van Eck. How then have researchers in the past connected the silver *kasthāné* to war and the estate of Van Eck? First, it appears from the notes from 2008 in the documentation folder of the Rijksmuseum that a connection was made between the silver *kasthāné* and the “fine decorated ‘belly-dagger’ with golden mounting.” This appears odd for two reasons: the *kasthāné* is silver rather than gold; and, as discussed above, the word *buiksteker* translates as knife, rather than sabre. The common word used in the VOC period for a sabre or sword was *houwer*. Yet as was already, mentioned at an earlier moment, the silver *kasthāné* had been connected to another object that appears in the estate of Van Eck, namely a silver mounted ‘*buiksteker*’.<sup>56</sup> Clearly, object descriptions from the Van Eck family archive got mixed up here. In fact, it seems that at a certain point this confusion led to the belief that they were one and the same, the golden mounted belly dagger from the description of the spoils of war and the silver mounted belly dagger from Van Eck’s family papers, and furthermore that these are actually descriptions of the silver *kasthāné*.<sup>57</sup>

While the initial list of 22 October 1765 does not contain a reference to a silver belly-dagger, the estate of Van Eck that was drawn up later does indeed include a silver-hilted ‘belly-dagger’.<sup>58</sup> Additional information was added in the document: namely, that this weapon had been used by “a certain Moor” who had been bribed by Kandy to attack Van Eck. “A belly-dagger with silver mounting being the instrument with which a Moor, being bribed by the enemies in Kandy attempted to take

With attachments], attachment with inventory of estate of Van Eck, dated 10 November 1765.

<sup>57</sup> Rijksmuseum Amsterdam, file with object information NG-NM-7114, D004812. Documentation by Eveline Sint Nicolaas, Curator of History Rijksmuseum Amsterdam, 2008.

<sup>58</sup> However, on that list, on which all objects from the Kandyan booty are marked with the letter A, are described as “A fine decorated belly-stabber with golden mounting” just as in the list of spoils of war made in Colombo. The “silver mounted belly dagger” is marked with an F and may have taken a different route into the estate in comparison to the objects marked “A”. NL-HaNA, 1.10.65.01, “Inventaris van het archief van de familie Van Panthaleon van Eck, 1398-1946” [Inventory of the family archive of Van Panthaleon van Eck, 1398-1946], Inv.no. 60. 1, “Brieven betreffende overlijden en regeling der nalatenschap van Lubbert Jan van Eck, heer van Overbeek, gouverneur van Ceylon, door de executeurs van diens testament te Colombo aan de erfgenamen gericht. Met bijlagen.” [Letters regarding the death and settlement of the estate of Lubbert Jan van Eck, Lord of Overbeek, Governor of Ceylon, addressed to the heirs by the executors of his will in Colombo. With attachments], attachment with inventory of estate of Van Eck, dated 10 November 1765.

the life of the deceased.”<sup>59</sup> This story regarding the attack on Van Eck is recorded in his own military diary, which served as the basis for popular publications on the war at the time and the episode may thus have been known to the family.<sup>60</sup> The description of this event in Van Eck’s Diary of the 1765 campaign gives us insight in the unfortunate encounter 9 February 1765: it mentions his encounter with a traitor, described as “a Moor” [muslim trader]. This person approached Van Eck, telling him that he had a gift for Van Eck from the king and ‘he then drew a stylet with such a wild look that Van Angelbeek (who was there with van Eck) suspected ill, and while pretending to be curious, he took and kept it.’<sup>61</sup> In the Kandyan kingdom small pihya were also used as stylets for writing olas, and thus this is what the ‘buiksteker’ in the inventory would refer to. An example of what this might have looked like is the silver Kandyan knife in the NMvW collection (RV-360-6017 and 6019).<sup>62</sup> Clearly this is a very different object from a kashāné, both in size and in shape

In other words, the hypothesis that NG-NM-7112 has been in possession of Governor Van Eck is not easy to substantiate with archival sources. The list of spoils of war from Kandy owned by Van Eck does not make mention of a silver kashāné, sword, or sabre, and the silver belly-dagger mentioned in his estate must have been a knife (pihya) rather than a kashāné, and was made for a different purpose. Which route did NG-NM-7112 then take into the collection of the Rijksmuseum?

### **The unrecorded arrival of the golden kashāné in the collection of the Dutch Stadtholder**

Our analysis of the history Van Eck’s estate showed that it is unlikely that the silver kashāné was among the Kandyan objects that arrived in the Dutch Republic in 1768. This means that it would not have followed the same trail into the stadtholder’s collection as either Lewke’s cannon or the golden kashāné. We have therefore tried to reconstruct the moment of the kashāné’s arrival in the collection of the Stadtholders: first through an analysis of the eighteenth century inventories of this collection and second by searching for correspondence with the heirs of Van Eck in the years after the arrival of the kashāné and the other objects from his estate.

Our search through the eighteenth-century inventories of the collection of Stadtholders Willem IV and Willem V did not yield any result.<sup>63</sup> In fact, none of the other five Kandyan objects were found in

---

<sup>59</sup> “Een buiksteeker met silver beslag zijnde een instrument waarmede seeker Moor van de vijanden omgecogt in Candia het op het Leeven van den overleeden had toegelegd.” NL-HaNA, 1.10.65.01, inv.no. 60. 1, “Brieven betreffende overlijden en regeling der nalatenschap van Lubbert Jan van Eck, heer van Overbeek, gouverneur van Ceylon, door de executeurs van diens testament te Colombo aan de erfgenamen gericht. With attachments], attachment with inventory of estate of Van Eck, dated 10 November 1765.

<sup>60</sup> See for example: *Middelburgse courant* 13-5 1766: “slot van het dagverhaal der generale expeditie tegen de koning van Candia” (accessed via [delpher.nl](http://delpher.nl))

<sup>61</sup> Raven-Hart, *The Dutch Wars with Kandy*, 92; SLNA, Lot 1, inv.no. 4881, “Report of the military campaign,” f. 223’. ‘De Koning had hem honderd fijne kleedjes en honderd zilvere buiksteekers of messen geschonken, waarvan hij niet meer, als een kleedje geaccepteerd had als mede maar een mes dat hij tans noch droeg en ter zelve tijd niet zulx een houding en wild gezicht uithaalde, dat de sekretarus Angelbeeck voor eenig boos opzet duchtend het zelve, onder schijn van enkele nieuwsgierigheid, van hem af vroeg en bij zich behield.’

<sup>62</sup> During our research we came across a silver Kandyan knife that might be identified *Ul Pihya*. Interestingly, it appears that it also has a provenance related to the stadtholders’ collection, and we have wondered whether there is a relation to the knife in the estate of Van Eck, but no provenance research has been done so far: see NMvW Museum Volkenkunde RV-360-6017 and 6019 (knife and sheath). RV-360-3018 was described as a “priem,” possibly referring to a stylus that accompanied the knife in the manner described above, but it appears to have been lost in the collection or to have disappeared.

<sup>63</sup> Koninklijke Verzamelingen [Royal Collections] (NL-KaHV), A, William IV, prince of Orange, ruler of Nassau (1711-1751), inv.no. 46 III, ‘Bekorte Staat en Inventaris van het Kabinet der Natuurlijke en door Kunstgemaakte Zeldzaamheden...’ [Concise overview and inventory of the Cabinet of natural and artistic curiosities]; NL-KaHV, A30, Anne of Hannover, Princess of Great Britain and Ireland (1709-1759), inv.no. 415, ‘Inventaris der Rariteiten overgegeven in het Kabinet der Natuurlijke en door Kunstgemaakte Zeldzaamheden, berustende onder de bewaaring van den Directeur Vosmaer’ [Inventory of curiosities transferred to the Cabinet of natural and artistic curiosities, residing under

these eighteenth century inventories either, including Lewke's cannon. At this point it is important to stress once more that the arrival of objects in the collection of the stadtholders is not recorded in a very systematic manner. Furthermore, documentation on the collection is scattered and not completely preserved. Available sources have been brought together by Laura Smeets.<sup>64</sup> The descriptions on the various inventory lists made in 1759 and 1760 (three in total) of the stadtholders' artefact(s) regarding the weapons are very generic as are the later inventories. This makes it impossible to eliminate or assign descriptions. For example, in the "curiosities" section of the 1759 list we find an "Indian sabre, with its scabbard and hilt mounted with silver." Could this be the silver *kasthānē*?<sup>65</sup> Before any conclusions might be drawn based on such generic descriptions, further research into the collection and collection history is necessary. And at this point this does not substantiate a conclusion that NG-NM-7112 arrived in the collection of the stadtholders before 1765.

Because the descriptions of the objects in the estate of Van Eck are so generic, and because of the longstanding tradition in Kandy of bestowing diplomatic gifts to governors and governor generals, we also looked more broadly into the Stadtholder's correspondence regarding objects arriving from Asia. The cabinet consisted of the collection that Willem V and his wife, Wilhelmine of Prussia, inherited from Willem IV and his wife, Anna van Hannover. The acquisitions made subsequently reflect their personal tastes, while the objects they received as gifts reflect their relations, networks, and socio-political positions. A considerable part of Willem V's cabinet was formed by gifts from the territories exploited by the West India and Dutch East India Companies.<sup>66</sup> Indeed the archive of Willem V does show several instances of donations of art-historical and natural-historical objects, as well as weapons and other personal belongings to the stadtholders. Several letters from or about Governor-General P.A. van de Parra (1761-1775) inform us for example that he donated a great variety of objects, including weapons, to the collection of Willem V and also to the family of the stadtholders themselves.<sup>67</sup> Yet, there was no silver *kasthānē* among them or anything that might resemble it.

<sup>67</sup> See for example, NL-KaHV, A31, William V Batavus, Prince of Orange-Nassau (1748-1806), Inv. No. 1798, P.A. van de Parra 1767-1775, dated 27 July 1772; NL-KaHV, A31, William V Batavus, Prince of Orange-Nassau (1748-1806), Inv. No. 1799, J. van Riemsdijk 1776-1777.

As a final step in our search for evidence regarding the arrival of the *kasthāné* in the collection of the Stadtholder, we looked at contemporary descriptions of the display at the Cabinet for Curiosities. The cabinet can be considered as the first public museum in the Netherlands. The cabinet attracted many visitors.

Indeed we found that Kandyen objects do appear in a written account from the German traveller Carl Heinrich Titius from 1777. When Titius visited the Cabinet of Curiosities of Willem V, he explicitly mentioned that he saw a silver cannon with gemstones, and noted that the cannon was taken by the Dutch in their last war with the king of Kandy. No doubt this refers to NG-NM-1015 (see report). Titius further remarked that other weapons are exhibited in that same room.<sup>68</sup> He did not further elaborate on those other weapons. Nevertheless, a guide from 1785 on the museum of with the collection of Stadtholder Willem V, described yet another room that was filled with armour, clothing, and other ornaments from inhabitants of the island of Ceylon (Sri Lanka), other Indian countries, and China.<sup>69</sup>

To conclude, the estate of Van Eck does not list any object (that could possibly be identified as the silver *kasthāné*). Furthermore, We have explained though that this by no means excludes the option that it was gifted after the war to the Willem V for the simple reason that the archival recording of objects in the possession of the Dutch stadtholder was incomplete. The eyewitness accounts reveal that the curator of the Cabinet made explicit reference to the Kandyen-Dutch war and that besides Lewke's cannon, other armour from Ceylon (Sri Lanka) was at display at the time.

### **When was the object first recorded and what route did it make through the Dutch collections ?**

The archival silences regarding the arrival of the silver *kasthāné* in the collection of the Dutch Stadtholder urged us to further scrutinize the museum documentation. In this section we focus on two questions: when was the object first recorded as part of a Dutch collection? And what route did it take through the collection? Our method was to work backwards in time through the museum documentation, this exercise included the decoding of the somewhat complex historical numbering of the object.

The Rijksmuseum as it exists now was built in 1885 and it incorporated the collections of various national museums that had been established over the course of the nineteenth century. These predecessors of the Rijksmuseum were in turn founded on older collections, such as the eighteenth century Cabinet of Curiosities of the Dutch Stadtholder Willem V. In this section we will trace the route that the silver *kasthāné* took through the various museums and collections, before it arrived in the Rijksmuseum. We focus on two questions. What knowledge was available at the time about the provenance of the silver *kasthāné*? And when was the object first recorded as part of a Dutch collection?

---

<sup>68</sup> Carl Heinrich Titius from 1777 cited by Johann Jacob Volkmann, *Neueste Reisen durch die vereinigten Niederlande* (Den Caspar Fritsch, Leipzig, 1783). "In zweeten saale ist unter den kunstsachen eine ganz silberne kanone mit golde ubersogen, graviert, und mit edelgesteinen besetzt, welche die Hollander in ihren lesten kriege, met den koninge von Candi erbeutet haben, und viele andre sehr kostbare Waffen." See also, Th.H. Lunsingh Scheurleer "Het Koninklijk Kabinet van Zeldzaamheden en zijn beteekenis voor het Rijksmuseum," *Oudheidkundig Jaarboek*, 13 (1946).

<sup>69</sup> *Guide ou nouvelle description de La Haye et de ses environs* ('s-Gravenhage, 1785), 257  
<https://www.delpher.nl/nl/boeken/view?coll=boeken&identificer=dpo:5469:mpeg21:0250>.

The unravelling of this part of the *kasthāné*'s history starts with the object number that is assigned to it: one of the collections that the Rijksmuseum housed from the start was that of the Nederlandsch Museum voor Geschiedenis en Kunst (Dutch Museum for History and Art) and this is what the NM in the object number of NG-NM-7112 stands for. In 1927 the objects from this collection were incorporated in the Rijksmuseum and became part of the Dutch History collection, Nederlandse Geschiedenis, hence the additional NG.<sup>70</sup>

The information on the inventory card is fairly basic and provides us with the following information:

Kris with a solid silver hilt, the knob of which is shaped like a dragon, in a sheath covered with silver leaf. South-east Asian [Achter-Indië] Length 60.5 Sheath 49 cm.

From the Koninklijk Kabinet van Zeldzaamheden No. 6025.

At a later moment, the following provenance information was added:

On loan Koloniaal Instituut. Received back in 1937.

And in 1816 transferred by King Willem I to the Koninklijk Kabinet van Zeldzaamheden.<sup>71</sup>

At the time, this inventory card of the Nederlandsch Museum the silver *kasthāné* was associated with "Achter-Indië," which was commonly used to refer to mainland Southeast Asia. This allocation remained uncorrected on the inventory card when the other information was added. In the nineteenth and early twentieth centuries, knowledge of Kandy armour and craftsmanship was apparently absent at the museum. For example, at the time the golden *kasthāné* was interpreted as Malay.<sup>72</sup>

The silver *kasthāné* had been transferred to the Nederlandsch Museum from the Koninklijk Kabinet van Zeldzaamheden (KKZ) in 1885, together with the golden dagger. Other Sri Lankan objects, such as Levke's cannon and the golden *kasthāné*, had already been transferred in 1875 as they had been interpreted by mistake as former possessions of Dutch national hero to Michiel de Ruyter.<sup>73</sup> In 1885 the Asiatic objects from that collection were distributed between the Nederlandsch Museum and 's Rijks Etnografisch Museum (NMvW Museum Volkenkunde). However, from this collection a specific group of objects were allocated to the Nederlandsch Museum to illustrate the ceremonial function of Stadtholder Willem V as highest director of the Dutch East India Company (VOC). The silver *kasthāné* was one of these objects.<sup>74</sup>

What do we know about the history of the silver *kasthāné* during the time it was kept in the Koninklijk Kabinet van Zeldzaamheden? Correspondence between Professor Lunsingh Scheurleer and

the Director of the Rijksmuseum van Volkenkunde (now part of Museum van Wereldculturen), P.H. Pott, from 1966 reveals more about the background of NG-NM-7112 in the collection of the Koninklijk Kabinet van Zeldzaamheden. Pott noticed that the numbers 6014-6029 in the catalogue were (almost) completely copied from the list of the objects King Willem I transmitted to the KKZ from his father's collection. Some of these ended up in the museum Volkenkunde, while others went to the Rijksmuseum. Pott was able to trace back almost all of the numbers from the list in the two museums. In the Rijksmuseum these were renumbered, ranging from NM-7053 to -7121.<sup>75</sup> And so, number 6026 in the KKZ became NM-7114 in the Nederlandsch Museum. In fact, all the KKZ numbers 6014-6029, have a colonial Asian background.<sup>76</sup>

In 1878 KKZ number 6025 was described as follows:

A sabre with a massive silver hilt, the stud being dragon headed, in a sheath like the latter [that is, a sheath covered with thin silver].<sup>77</sup>

The silver *kasthāné*, golden *pihiya*, and the golden *kasthāné* were not the only Kandyan/Sri Lankan objects in the collection of the Koninklijk Kabinet van Zeldzaamheden. In fact, it appears that these objects were registered together in the KKZ collection as if belonging to a group of objects. Over the course of the nineteenth century, their Sri Lankan provenance was forgotten, but in 1823 this was not yet the case: the contemporary director of the Koninklijk Kabinet van Zeldzaamheden, R.P. Van de Kastelee, then described that desk 13 in the fourth room presented a range of Asiatic objects. Among them were a treatise in Sinhalese and a decorative belt with a snake motif, worn by the people of Ceylon.<sup>78</sup> R.P. van der Kastelee, first director of the KKZ, explicitly stated that these objects originated from the Cabinet of Stadtholder Willem V. On desk 15 in the same hall, the objects were exhibited which we now identify as the golden *kasthāné* together with the silver *kasthāné*, the golden *pihiya*, and another Kandyan knife which is now in the Wereldculturen collection (or: NG-NM-560, 7112, -7114 and RV-360-6017). In addition, two *olas* (palm leaf manuscripts) with Tamil and Sinhalese script were exhibited together with a copper plate with Sinhalese letters and an "Eastern writing pen," presumably a stylus, used to write on the palm leaves.<sup>79</sup> A conclusion we can draw from these records is that the silver *kasthāné* was exhibited as part of a group of objects that originated from Sri Lanka. Over time, however, the knowledge about this group of objects had faded.

The silver *kasthāné* seems to be one of the objects transferred from the royal collections by Willem I to the Kabinet van Zeldzaamheden in 1816: the descriptions of numbers 6014-6029 on the inventory list of the KKZ of 1878, were a direct copy of the descriptions on the list of transferal of 1816 by King Willem I.<sup>80</sup>

<sup>78</sup> R.P. Van de Kastelee, *Handleiding tot de bezichtiging van het Koninklijk Kabinet van Zeldzaamheden op Mauritshuis, in 's Gravenhage* (The Hague, n.d. [1824], 97-101. "Eene onbegrijpelijk kunstige van zilverdraad gevlochten slang, de kop en de staat schijnen daar naderhand aangemaakt te zijn; zonder deze is het een versiersel van een volk op Ceilon, wordende als een gordel om het lijf gedragen, wanneer aan de einde sluitingstukken zijn. Weegt 5 ons, 16 eng. Of 268,411 wig." We have not yet identified this object in the collection.

<sup>79</sup> *Ibid.*

<sup>80</sup> This is what P.H. Pott also concluded in 1966.

The “List of objects transferred to the Royal Cabinet of Curiosities in The Hague on the orders of King William I,” number 183.10 has the following description:

A sabre with a solid silver handle, the knob of which is shaped like a dragon, in a sheath covered with lofty decorated silver fittings.<sup>81</sup>

The original copy of this list is kept in the National Archives and it contains objects from the collection of Willem V that Van de Kastele had received from de *hofraad* Hoffman. According to Jan van Campen, this list referred to the objects that Willem V took with him to England when he was exiled in 1795.<sup>82</sup> However, Tom Quist has suggested that this list is a copy of Hoffman’s inventory on the weapons and walking sticks, written in German. In the view of Tom Quist, the listed stayed at Oranienstein Castle.<sup>83</sup> This had been the residence of Willem V since 1801. We have not been able to obtain further information on this question, but in any case it is very likely that the silver *kasthāné* and other objects on the German-language list were transferred to England or Germany or both and returned to the Netherlands in the period 1813-1816 when the monarchy was established, with Willem V’s son, Willem I. From the museum documentation we can thus conclude that the golden silver *kasthāné* must have entered into the collection of Willem V at any moment prior to his exile in England and Germany in 1795.<sup>84</sup>

As discussed above we have not been able to identify the silver *kasthāné* in the eighteenth-century inventories of the collection of the stadtholders Willem IV and Willem V that are kept in the Royal Archives (Koninklijk Huis Archief).<sup>85</sup> This is where the archival trail through the museum documentation and collection inventories ends.

<sup>84</sup> This stay rejects the thesis of in the Rijksmuseum documentation that NG-NM-7112 as well as NG-NM-560 were the two weapons that, like NG-NM-1015 (Cannon of Kandy), were presented as one of the five objects, the “vaderlandsche gedenkstukken” to the new Batavian Parliament, as symbols for a new Netherlands in 1795. Among them was the sabre of Michiel de Ruyter and a cannon ascribed to the Ruyter. The cannon can be identified as NG-NM-1015 (see report), but the sabre cannot be linked to NG-NM-7112. See also: Van Luttermvelt, “Herinneringen Aan Michiel Adriaenzoon de Ruyter,” 36.

Vosmaer], 1782; NL-KaHV, A31, inv.no. 185, ‘Lijsten van in januari 1795 meegenomen gouden en zilveren tafelhoed, schilderijen en kleding’ [Lists of the golden and silver tableware, paintings and clothing that were taken along] dated 1795-1798; NL-KaHV, A31, inv.no. 186, ‘Briefwisseling tussen W.C. Vosmaer en Willem V over restanten van de stadhouderlijke collecties die naar Duitsland verzonden kunnen worden’ [Correspondence between W.C. Vosmaer and Willem V on what was left of the stadtholder’s collection that could be shipped to Germany] dated 1803.

Also consultation of the inventory of the Vosmaer family did not give any result. The following numbers are part of the section of Arnout Vosmaer as director of the stadtholder’s cabinets. NL-HaNA, 2.21.271 ‘Inventaris van het archief van de familie Vosmaer’ [Inventory of the archive of the Vosmaer family], inv. no. 63-67.

## Discussion

Despite extensive archival research, we have not succeeded in fully reconstructing the provenance history of the silver *kasthāné*. What is clear however is that NG-NM-7112 is a *kasthāné* from Kandy of outstanding craftsmanship, that was made in the royal Four Workhops (*pattal hatara*) most likely as part of the personal ceremonial attire of one of the higher aristocrats at the court. We also establish that the silver *kasthāné* was probably already in the collection of stadtholder Willem V at the end of the eighteenth century.

The archival documentation does not allow us to reliably deduce that the *kasthāné* was among Van Eck's spoils of war. At least, it does not occur on the list of ten objects from Kandy in his possession, nor in his estate. Thus, the questions that linger are how, when, and why did it arrive in the collection? These are more difficult to answer. Below, we provide a discussion based on our archival research and present different possible routes, but in each case the evidence remains scanty and circumstantial.

As discussed above, the archival documentation on the conquest of Kandy of 1765 shows that many objects were taken from the palace and the temple. Some of these arrived in Colombo and were traded locally or stayed in private hands. But certainly not all objects were recorded at the time. For example, we found that twenty years after the war a drinking bowl from the Kandyan king was still in possession of a VOC officer on the island.<sup>86</sup> Another example is the arrival of “vier grote Candiase geweren” (“four large Kandyan weapons”) as gifts to the stadtholder from Batavia (probably from the Governor General) in 1767. These guns are not mentioned among the spoils of war, but we assume that their provenance is related to the war as they made their way to Batavia apparently soon after.<sup>87</sup> Thus, the fact that we have not been able to identify the silver *kasthāné* among the estate of Van Eck does not mean that the silver *kasthāné* could not have been taken from the Royal Palace in Kandy during the siege. However, a provenance as being bought, or gifted from an Kandyan nobleman to a VOC employee — cannot be entirely excluded on the basis of similar contextual evidence.<sup>88</sup>

An ultimate point that bears emphasis is that for over fifty years now the Rijksmuseum has maintained that the silver *kasthāné* was part of the spoils of the Kandyan-Dutch war. Together with the cannon, the golden *kasthāné*, and the gold mounted knife, they have come to symbolise the moment of plunder and destruction of the Kandyan palace. This in itself has thus become an important part of the object's history.

<sup>87</sup> See: Alicia Schrikker and Doreen van den Boogaart, PPROCE report NG-NM-519 and 520.

<sup>88</sup> Cf. Lunsingh Scheurleer, “Twee Oosterse Sieraden,” 15–26; Van Campen and Hartkamp-Jonxis, *Aziatische Weelde*, 86. The latter writes about a servant of a VOC employee who had bought *kasthāné* in Sri Lanka as a gift for two collectors in Groningen. Unfortunately, the authors could not provide us with a reference to the archival source.; During the PPROCE research a start was made with mapping the culture of gift-giving between the VOC and Kandy in the 1740s and 1750s, as well as to what happened to the objects after they were in VOC hands. A draft document ‘Gift giving, Embassies and Collections’ will be available in the documentation folder of this object from April 2022. An elaboration on this research went beyond the objectives of the PPROCE research, but future research on the practice of gift giving, flows of gifts, as well as the afterlives of these Kandyan gifts in Sri Lanka, the Netherlands and the rest of the world could provide more insight. The draft documents can be consulted as a starting point for future research.
